SUMMARY

AI Engineer focused on AI safety who builds trustworthy production AI. 12+ years shipping AI across finance, government, and climate tech, from LLM platforms and RAG pipelines to computer vision and MLOps. PhD at Aarhus University on trustworthy digital twins for critical infrastructure (water and cooling systems) adds depth in AI safety, cybersecurity, and critical-infrastructure resilience. Peer-reviewed in Elsevier Computers and Security. Open to research collaboration on AI safety, digital twins, and trustworthy critical-infrastructure AI, plus speaking and advisory work. *Concurrent track: completed MSc and MEng while shipping at BRB and building two startups.*

Core Impact: 100K+ users served | 29x latency cut | 60% faster deploys | 40% audit accuracy lift | \$150K+ savings | 3 hackathon wins 2025–2026

EXPERIENCE

Aarhus University – PhD Researcher, Digital Twins for Critical-Infrastructure Trust

2026 – Present (Aarhus, Denmark)

- Research on digital twins for trust and security in critical infrastructure, verifying that a virtual model faithfully and securely represents the physical system, with a focus on water and cooling systems.
- Work at the intersection of AI safety, cybersecurity, and critical-infrastructure resilience.

Deep Forestry AB – AI Research Engineer

2026 (Stockholm)

- Enabled real-time autonomous landings below the forest canopy by cutting end-to-end perception latency 29x (5.8s to 200ms) and reaching F1 0.926 on a held-out flight session on NVIDIA Jetson Orin NX.
- Built the hybrid geometric and neural pipeline (RANSAC + PointNet, PointNet++, DGCNN) and a session-level evaluation harness over real LiDAR flight data.

SoiQet (Social IQ Set) – Co-Founder and CEO

2025 – Present (Aarhus)

- Founded and shipped SoiQet, an AI-powered social media platform for creators, brands, and teams (Plug Into Social Intelligence). Built the production multi-tenant SaaS on Azure (Lovable, Python, Node.js, Supabase, React) end to end: in-house RAG, structured outputs, Stripe billing, Supabase row-level security, OAuth across six social networks.
- Applied AI-engineering practices across multiple LLM providers (model evaluation, RAG, guardrails) so model-swap, cost, and performance trade-offs are measurable under real user inputs.

Bank of Brasilia (BRB) – AI and DevSecOps Engineer

2014–2016, 2024–Present (Brasilia)

- Stepped away from the management track in 2024 to return to hands-on AI engineering and zero-to-one building.*
- Delivered a production NLP chatbot (Python, TensorFlow) during a Silicon Valley engagement that cut customer response time 40% for 100K+ users, plus C-suite Power BI dashboards.
- Built GDPR-compliant analytics for the instant payments system on PySpark, supporting risk and product decisions across the bank.
- Inherited a slow, heavily-audited deployment process and architected an automated release pipeline from scratch (Jenkins, GitLab, Docker, Kubernetes, OpenShift) that cut deployment time 60% while meeting the compliance requirements of a regulated banking environment.

Bank of Brasilia (BRB) – IT Manager

2016 – 2024 (Brasilia)

- Owned a \$1M+ annual IT budget end to end with full P&L responsibility, cutting operating cost 15% and improving audit accuracy 40% in a regulated banking environment.
- Built and led an engineering team of 10+ from scratch, including hiring, OKR planning, and a Lean-IT operational rollout that reduced operational waste 20% and unblocked daily releases.

Tree++ (Climate Tech Startup) – Co-Founder and Chief Innovation Officer

2024 – Present (Aarhus)

- Built the core computer-vision pipeline and ML matchmaking system from zero to production, enabling the planting of 1,000+ trees across 10 countries. Participated in Impact Cup, Drivhuset (2025).

LabRisk (Cybersecurity and Risk Lab, UnB) – Cybersecurity Research Engineer

2024 – Present (Brasilia)

- Co-authored peer-reviewed research in Elsevier Computers and Security (DOI 10.1016/j.cose.2025.104584) on CIS-controls-aligned cybersecurity frameworks for the Brazilian judiciary.

SKILLS

AI and ML: PyTorch, TensorFlow, Scikit-learn, Hugging Face, LLM fine-tuning, RAG, prompt engineering, MLOps, NLP, computer vision (PointNet/++/DGCNN), model deployment, evaluation harnesses.

Cloud and DevOps: Azure, GCP, AWS, Kubernetes, Docker, OpenShift, Jenkins, GitLab CI, Terraform, CI/CD, DevSecOps, observability (Grafana).

Data and Backend: Python, SQL, TypeScript, Node.js, PySpark, Airflow, Kafka, PostgreSQL, MongoDB, REST and GraphQL APIs, OAuth, multi-tenant RLS.

Cybersecurity: CIS Controls, GDPR, risk management, audit and compliance, Lean IT.

Leadership: Team leadership (10+ engineers), \$1M+ P&L, OKR planning, project management, hiring, vendor strategy, audit and compliance.

Languages: Portuguese (native, C2), English (C1, TOEFL 101/120), Spanish (B1), Swedish (SFI C / B1).

EDUCATION

Stockholm University – MSc Computer and Systems Sciences (AI and IoT), Swedish Institute Scholar (SISGP)

2024 – 2026 (Stockholm)

University of Brasilia (UnB) – MEng Cybersecurity. Publication: Elsevier Computers and Security (DOI

2024 – 2026 (Brasilia)

10.1016/j.cose.2025.104584)

UPIS Faculdades Integradas – BSc Information Systems

2010 – 2013 (Brasilia)

CERTIFICATIONS AND AWARDS

Certifications: *Leadership:* EA Sweden Fellowship in Effective Altruism (2026), Women's Leadership (SOUL, 2024), Self-Leadership (Hyper Island and Swedish Institute, 2024), Collaborative Approaches to Societal Issues (SSE, 2024). *IT and AI:* EXIN DevOps Master (2020), Lean IT Foundation (2019), COBIT 5 (ISACA, 2015), ITIL V3 (2015), Designing and Building AI Products (MIT, 2022), TOEFL iBT 101/120 (ETS, 2024).

Speaking and Judging: Speaker, "New Tech, Old Rules" panel, Nordic Tech Week, Stockholm (2026). Judge, Apart Research Global South AI Safety Hackathon, Technical AI Safety, AI Governance and AI Security tracks (2026).

Awards: 1st place, EpiMinds Google AI Hackathon (2026), Kong AI-Assisted Coding (2025), Kolomolo AI-Assisted Coding (2025). Swedish Institute Scholarship for Global Professionals (2024). Strategic Configuration Management, Efinance (2019). WorldSkills National Phase, Web Design (2012).
