SUMMARY

AI engineering leader with 12+ years building and scaling production systems across AI/ML, DevSecOps, cloud, and cybersecurity. Delivered AI products for 100K+ users, managed $1M+ IT budgets, and led engineering teams of 10+ across banking, government, research, and startups. Two master's degrees (AI and IoT at Stockholm University and Cybersecurity at UnB), Swedish Institute Scholar, published in Elsevier's Computers & Security, and first-place winner in three hackathons in Stockholm in 2025–2026, including EpiMinds Google AI. Work-authorized in Sweden and pursuing Head of AI Engineering, Engineering Manager, or Principal Engineer roles focused on technical strategy, high-performing teams, and production-grade AI systems.

Core Competencies: AI/ML Engineering | LLM & Generative AI | MLOps | DevSecOps | Cloud Architecture | Cybersecurity & GDPR | IoT Systems | Team Leadership (10+) | P&L Management ($1M+) | Product Strategy

EXPERIENCE

Deep Forestry AB – AI Research Engineer (MSc Thesis)
2026 – Present (Stockholm, Sweden)

- Designed and evaluated a hybrid geometric-neural pipeline for real-time autonomous landing zone detection in below-canopy forests using LiDAR point clouds, combining RANSAC-based geometry with PointNet, PointNet++, and DGCNN models.
- Reduced end-to-end latency by 29× from 5.8s to 200ms through KD-Tree indexing and voxel downsampling optimizations on real forest flight data collected with Deep Forestry's autonomous drone platform.

SoiQet – Social IQ Set – Founder and CEO
2025 – Present (Stockholm, Sweden)

- Founded SoiQet, an LLM-powered platform integrating 6 social networks for small businesses and influencers, combining RAG-based content generation, scheduling, and analytics on GCP.
- Built the end-to-end product from prototype to production using Lovable, Python, Node.js, Supabase, and React, improving content quality and workflow speed across integrated channels through prompt engineering and platform design.
- Own product vision, engineering execution, and go-to-market strategy, leading early validation, architecture decisions, and platform growth as Founder and Head of Engineering.

Tree++ (Tree Plus Plus, Climate Tech Startup) – Co-founder and Chief Innovation Officer
2024 – Present (Stockholm, Sweden)

- Lead technical strategy and fundraising for a climate-tech platform that supported the planting of 1,000+ trees across 10 countries in 2026, connecting volunteers and landowners through an AI-powered carbon footprint calculator and QR-based carbon credit tracking.
- Built a computer vision pipeline for imagery-based carbon credit consumption monitoring and an ML matchmaking system that connects offsetting requests with volunteers and landowners across the platform ecosystem.
- Hired and led the engineering team, setting delivery standards, supporting performance management, and contributing to roadmap and budget planning.

Award: Impact Cup – Drivhuset (2025)

Bank of Brasilia – BRB (top-5 Brazilian financial institution, 4,000+ employees) – IT Analyst and DevOps Engineer
2014 – Present (Brasilia, Brazil)

- Built a production AI chatbot using Python, TensorFlow, and NLP that reduced customer response time by 40% for 100K+ users during a Silicon Valley engagement.
- Led the design and implementation of DevSecOps CI/CD pipelines across Jenkins, GitLab, Docker, OpenShift, and Kubernetes, reducing deployment time by 60% and improving release reliability.
- Built executive Power BI dashboards for C-level decision-making and supported compliance with Central Bank regulations and GDPR-equivalent data protection standards.
- Partnered directly with the CIO, CFO, and COO to align IT delivery, compliance, and investment priorities with business goals.

Bank of Brasilia – BRB (top-5 Brazilian financial institution, 4,000+ employees) – IT Manager
2016 – 2024 (Brasilia, Brazil)

- Managed a $1M+ IT budget with full P&L accountability, reducing operating costs by 15% and generating $150K+ in savings through vendor renegotiation and contract restructuring.
- Led a team of 10+ IT professionals across hiring, performance reviews, OKR planning, career development, and adoption of COBIT, ITIL, Agile, and Lean IT practices.
- Redesigned Change and Configuration Management processes, improving compliance and audit accuracy by 40% and lowering regulatory exposure.
- Led Lean IT and DevSecOps transformation efforts that reduced operational waste by 20% and improved execution standards across the department.

Award: Strategic Configuration Management – Efinance (2019)

LabRisk – Cybersecurity and Risk Lab, Universidade de Brasilia (UnB) – Cybersecurity Research Engineer
2024 – Present (Brasilia, Brazil)

- Conduct research on cybersecurity management, risk, and privacy for the public sector, covering CIS controls, GDPR-aligned frameworks, and judiciary cybersecurity in Brazil.
- Published peer-reviewed findings in Elsevier's Computers & Security journal, strengthening evidence-based cybersecurity governance for public institutions.

Stockholm University – SU – Teaching Assistant – Internet of Things
2025 – 2026 (Stockholm, Sweden)

- Supported 200+ students in IoT coursework covering Python, sensor integration with MQTT, edge computing, and data processing pipelines.

Drivhuset Stockholm AB – Stockholm University (SU) – Student Ambassador
2025 – Present (Stockholm, Sweden)

- Hackathon organizer, mentor founders and students on technology strategy, product development, and early-stage execution through Stockholm University's entrepreneurship programs.

Brazilian Institute of Information in Science and Technology – IBICT – Research Engineer
2022 (Brasilia, Brazil)

- Customized Archivematica for Kubernetes and OpenShift, enabling digital preservation infrastructure for government agencies managing millions of digital assets.

Ministry of Integration and Regional Development – MCID – Software Engineer 2014 (Brasilia, Brazil)

- Modernized legacy PHP and MySQL systems, improving scalability and performance for national integration services used by government agencies across Brazil.
- Built responsive web and mobile applications that expanded citizen access to government digital services.

SENAI – National Industrial Training Service – Web Developer and Designer 2010 – 2012 (Brasilia, Brazil)

- Built PHP and MySQL e-learning platforms supporting 2,000+ students with interactive modules, progress tracking, and assessment tools.

Award: WorldSkills National Phase – Web Design (2012)

VOLUNTEERING

SU Heroes – Hackathon Team, Stockholm University (SU) – Team Leader 2024 – Present (Stockholm, Sweden)

- Lead multidisciplinary teams building agentic AI systems, mentoring students and engineers in AI/ML, cloud architecture, and rapid prototyping under hackathon constraints.

1st Place in 3 hackathons: EpiMinds Google AI Hackathon (2026), Kong AI Assisted-Coding Hackathon (2025), Kolomolo AI-Assisted Coding Hackathon (2025)

Alla Ska Få Mat – Volunteer and Web Developer 2024 – Present (Stockholm, Sweden)

- Built and maintain the website for a nonprofit that distributes weekly meals to vulnerable families and homeless individuals in Stockholm, while also supporting volunteer operations on the ground.

DevOpsDays Brasilia – Volunteer Organizer 2024 – Present (Brasilia, Brazil)

- Coordinate technical conferences for 250+ participants, build partnerships with industry and academia, and curate DevSecOps and AI/ML content.

Insphas – Institute of Psychology – Volunteer IT Lead 2018 – Present (Brazil)

- Modernize digital presence and infrastructure for a mental health institute, including websites, content strategy, and communication flows for psychology services.

EDUCATION

Stockholm University – SU – Master of Science in Computer and Systems Sciences (AI and IoT) 2024 – 2026 (Stockholm, Sweden)

- Specialization: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, IoT Systems, and Autonomous Systems.
- MSc thesis in collaboration with Deep Forestry focused on a hybrid geometric-neural pipeline for real-time autonomous landing zone detection in below-canopy forests using LiDAR point clouds.
- Teaching Assistant in Internet of Things, Student Ambassador at Drivhuset Stockholm, and member of the Network for Global Professionals (NFGP) at the Swedish Institute.

Award: Swedish Institute Scholarship for Global Professionals (SISGP)

University of Brasilia – UnB – Master of Engineering in Cybersecurity 2024 – 2025 (Brasilia, Brazil, concluding)

- Specialization: Risk management, AI for cybersecurity, critical infrastructure protection, and security governance frameworks.
- Published peer-reviewed research in a top-tier journal on cybersecurity frameworks for judicial systems.

Publication: Elsevier's Computers & Security Journal (2025) | DOI: 10.1016/j.cose.2025.104584

Massachusetts Institute of Technology – MIT – Designing and Building AI Products (Executive Program) 2022 (Boston, USA)

- 40-hour executive program focused on AI product development, ML system deployment, and scaling AI products in production environments.

Descomplica – MBA in Innovation, Technology & Entrepreneurship | Postgraduate in Data Analysis 2022 – 2023 (Brasilia, Brazil)

Fundação Getulio Vargas – FGV – MBA in Project Management 2016 – 2018 (Brasilia, Brazil)

Faculdades Integradas – UPIS – BSc in Information Systems 2010 – 2013 (Brasilia, Brazil)

SKILLS

Leadership & Management: Technology Strategy, Team Leadership (10+ professionals), P&L Management ($1M+), OKR Planning and Execution, Stakeholder Management, Cross-Functional Collaboration, Strategic Planning, Technical Hiring, Change Management, Vendor Management, Budget Optimization, Agile Delivery.

IT Governance & Frameworks: COBIT, ITIL, CMDB, ITSM, BPMN, Lean IT, PMBOK, GDPR, Risk Management, Change Management, Configuration Management, Compliance, Audit.

Programming Languages: Python, JavaScript, TypeScript, SQL, Java, PHP, Bash, R, Groovy, Erlang.

AI & Machine Learning: TensorFlow, PyTorch, Scikit-Learn, Keras, Hugging Face Transformers, LLM Fine-Tuning, RAG (Retrieval Augmented Generation), Prompt Engineering, XGBoost, LightGBM, MLOps, NLP, Computer Vision, Deep Learning, Neural Networks, Model Deployment, Feature Engineering, Data Pipelines, Model Monitoring.

Data Engineering & Analytics: Apache Spark, Hadoop, Pandas, NumPy, Power BI, Kafka, MQTT, PostgreSQL, MySQL, MongoDB, Redis, Oracle, ETL Pipelines, Data Warehousing, Business Intelligence.

Cloud, DevOps & Automation: Kubernetes, Docker, Jenkins, GitLab, GitHub, OpenShift, Terraform, Ansible, AWS, GCP, Azure, CI/CD, DevSecOps, Infrastructure as Code, Grafana, Zabbix, Observability, A/B Testing.

Integration & Architecture: System Design, REST APIs, GraphQL APIs, Microservices, Event-Driven Architecture, Distributed Systems, Platform Engineering, IoT Integration, Node.js, React.

Tools & Platforms: Jira, Trello, Teams, Git, Linux, Jupyter, MLflow, SonarQube, Nexus, Lovable, Temporal, n8n, Swish.

Languages: Portuguese (Native), English (Fluent – TOEFL Certified), Spanish (Intermediate), Swedish (SFI Level C, actively studying).

CERTIFICATIONS

Leadership: EA Sweden Fellowship – Effective Altruism (2026), Women's Leadership Program (SOUL, 2024), Self-Leadership Program (Hyper Island & Swedish Institute, 2024), Collaborative Approaches to Societal Issues (Stockholm School of Entrepreneurship, 2024) | **AI & Data:** Business Intelligence Foundation (Certiprof, 2024), Data Analysis (ENAP, 2023), Designing & Building AI Products (MIT, 2022) | **IT Governance:** DevOps Master (EXIN, 2020), Lean IT Foundation (EXIN, 2019), COBIT 5 Foundation (ISACA, 2015), ITIL V3 Foundation (EXIN, 2015) | **Agile:** Lean Six Sigma White Belt (Certiprof, 2024), Scrum Foundation (Certiprof, 2019) | **Language:** TOEFL iBT (ETS, 2024)
