SUMMARY

AI Engineer focused on AI safety who builds trustworthy production AI. 12+ years shipping AI across finance, government, and climate tech, from LLM platforms and RAG pipelines to computer vision and MLOps. PhD at Aarhus University on digital twins for district cooling (SWiM, funded by the Grundfos Foundation) adds depth in AI safety, cybersecurity, and critical-infrastructure resilience. Peer-reviewed in Elsevier Computers and Security. Completed two master's degrees while shipping at BRB and building two startups.

EXPERIENCE

Aarhus University – PhD Fellow, Digital Twins for District Cooling (SWiM) Aug 2026 - Present (Aarhus)

- Verifying that district cooling installations run as they were designed, combining Building Information Modelling, AI and digital twins (SWiM, funded by the Grundfos Foundation).

Deep Forestry AB – AI Research Engineer Dec 2025 - Jun 2026 (Uppsala)

- Enabled real-time autonomous landings below the forest canopy by cutting end-to-end perception latency 29× (5.8s to 200ms) and reaching F1 0.926 on a held-out flight session on NVIDIA Jetson Orin NX.
- Built the hybrid pipeline (RANSAC, PointNet++, DGCNN) and its evaluation harness on real LiDAR flight data.

SoiQet (Social IQ Set) – Founder and CEO Aug 2025 - Present (Aarhus)

- Built SoiQet, a production multi-tenant AI platform for social media, on Azure (Lovable, Python, Node.js, Supabase, React) end to end: in-house RAG, structured outputs, Stripe billing, Supabase row-level security, OAuth across six social networks.

Bank of Brasilia (BRB) – IT Analyst and DevOps Engineer Dec 2014 - Present (Brasilia)

- Delivered a production NLP chatbot (Python, TensorFlow) during a Silicon Valley engagement that cut customer response time 40% for 100K+ users.
- Built GDPR-compliant analytics for the instant payments system on PySpark, supporting risk and product decisions across the bank.
- Architected an automated release pipeline from scratch (Jenkins, GitLab, Docker, Kubernetes, OpenShift) that cut deployment time 60% under banking compliance.

Bank of Brasilia (BRB) – IT Manager and Engineering Manager May 2016 - Jul 2024 (Brasilia)

- Owned a $1M+ annual IT budget end to end with full P&L responsibility, cutting operating cost 15% and improving audit accuracy 40% in a regulated banking environment.
- Built and led an engineering team of 10+ from scratch, including hiring, OKR planning, and a Lean-IT operational rollout that reduced operational waste 20% and unblocked daily releases.

Tree++ (Climate Tech Startup) – Co-founder and Head of Innovation Oct 2024 - Present (Stockholm)

- Built the core computer-vision pipeline and ML matchmaking system from zero to production, enabling the planting of 1,000+ trees across 10 countries.

LabRisk (Cybersecurity and Risk Lab, UnB) – Cybersecurity Research Engineer Aug 2024 - Present (Brasilia)

- Co-authored an Elsevier Computers and Security paper (DOI 10.1016/j.cose.2025.104584) extending the CIS Controls for the Brazilian judiciary.

SKILLS

AI and ML: PyTorch, TensorFlow, Scikit-learn, Hugging Face, LLM fine-tuning, RAG, MLOps, NLP, computer vision, evaluation harnesses.

Cloud and DevOps: Azure, GCP, AWS, Kubernetes, Docker, OpenShift, Jenkins, GitLab CI, Terraform, CI/CD, DevSecOps, observability (Grafana).

Data and Backend: Python, SQL, TypeScript, Node.js, PySpark, Airflow, Kafka, PostgreSQL, MongoDB, REST and GraphQL APIs, OAuth, multi-tenant RLS.

Security and Leadership: CIS Controls, GDPR, risk management, audit and compliance, team leadership (10+ engineers), $1M+ P&L, OKRs, hiring.

Languages: Portuguese (native), English (C1, TOEFL 101/120), Spanish (B1), Swedish (B1), Danish (beginner).

EDUCATION

Stockholm University - MSc Computer and Systems Sciences, Swedish Institute Scholar — 2024 - 2026 (Stockholm)

University of Brasilia (UnB) - MEng Cybersecurity and Risk Management — 2024 - 2026 (Brasilia)

UPIS Faculdades Integradas - BSc Information Systems — 2010 - 2013 (Brasilia)

CERTIFICATIONS AND AWARDS

Certifications: BlueDot Technical AI Safety (2026), EA Sweden Fellowship (2026), MIT AI Products (2022), EXIN DevOps Master (2020).

Awards and Speaking: Speaker, Nordic Tech Week (2026). Judge, Apart Global South AI Safety Hackathon (2026). 1st place: EpiMinds Google AI (2026), Kong and Kolomolo AI-Assisted Coding (2025).
